

David Humphrey is an attorney, and CEO of a number of companies,

He is a National Board Member of the Northwest Autism Foundation, THE FORUM, ACT Today! , and a co-founder of Autism Treatment Network (ATN), a joint project with 17 top tier-treating hospitals headed by Massachusetts General Hospital.

He is the co-founder and Director of the physician training group, Medical Academy of Pediatric Special Needs (MAPS).

He was also executive vice chairman and Board Member of the Autism Society of America and the and the Autism Research Institute

He is also the President and owner of Kirkman Group, Inc., and other companies, including a pharmaceutical/nutraceutical company, and an environmental laboratory. Mr. Humphrey environmental laboratory focuses on Mass Spectrometry (MS) that specializes in analytical technique that measures the mass-to-charge ratio of charged particles and for elucidating the chemical structures of molecules.

For the past 11 years, Mr. Humphrey has devoted much of his time to the research and study of autism. He is a successful entrepreneur and an attorney who has founded several large companies.

After graduating near the top of his class at the U. of Washington School of Law, Mr. Humphrey (who is a member of MENSA), went on to form The Humphrey Corp, a business manufacturing "Frisbees" with printed logos on the saucer top for use as promotions. It became the largest "flyer" manufacture in the world. One of his other companies was named for four years to Inc. magazine's prestigious list of "500 Fastest Growing Companies in the Nation." His jewelry company in Hawaii, Maui Gold, became the States largest jewelry manufacturer and one of the 30 largest companies in Hawaii. His current company, Kirkman Group, Inc., was named by Oregon Business magazine as one of the "Top 100 Companies to Work for in Oregon." and "Top 100 Green Companies." He has been a partner and "of counsel" in several law firms in Oregon and Hawaii.
